

Since the Pandora is a project started by only a few people, you won't find it in stores or big online shops.

The first 4000 units are currently in production, over 900 are already delivered.
If all goes well, the 4000 units will be delivered until the end of December.

Unfortunately, the first batch is already sold out - but fear not: The second batch will be produced immediately after the first one.

You can now preorder a unit from the second batch!

The faster you order, the earlier you will receive your unit. The cost for a Pandora is 349 USD (without VAT) or approx. 330 EUR (including VAT).

If you are from UK, within the EU or worldwide, you can order from **sales@openpandora.org**
If you are from Germany or within the EU, you can order from **info@openpandora.de**

Please be aware that the money needs to be paid in advance.

Why? Easy: We need to pay all the parts for the Pandora production in advance.

And as we don't have a million Euro lying around...
